MAINTENANCE CHECKLIST

Date:

ACTION	COMPLETED (Y/N)	COMMENTS
Inspect and test kitchen equipment (ovens, stoves, fryers, grills) for proper functioning.		
Check refrigerators, freezers, and walk-ins for correct temperature and cooling.		
Verify that dishwashers and sinks are operating effectively.		
Inspect plumbing for leaks, blockages, or other issues.		
Check electrical systems for any flickering lights, faulty outlets, or wiring problems.		
Check for enough fuel to power the whole property for 48 hours minimum.		
Check for internet stability for all the WiFi & LAN connections.		
Check if all air-conditioners, fans, extractors and ventilation systems are functional in all departments.		
Calibrate cooking equipment, thermostats, and temperature controls.		
Inspect the building's roof, walls, and foundation for any structural issues.		
Test fire suppression systems, alarms, and emergency lighting/exits, escape routes, fire extinguishers and first-aid supplies are visible and accessible.		
Check if the servers are functional & if the sound mixers (console) are well tuned.		
Ensure emergency exits are clear and properly marked.		
Check for trip hazards or other safety concerns.		
Ensure all exhaust fans and hoods are clean and working.		
Verify the functionality of security cameras, alarms, and access control systems.		
Check if there is enough pumped water in the tank for the servicing of washrooms and sufficient for two shifts.		
Check the condition of exterior doors, windows, and signage.		
Check if all speakers are connected and functional.		
Communicate with kitchen and serving staff to address any technical concerns or issues.		

Confirm that there are no gas, water or electrical leaks, unusual smells or other immediate safety hazards.		
Inspect all tables and chairs throughout the restaurant for wobbling; rectify or report any defects.		
Confirm that all illuminated and operational signage is working correctly.		
Update the maintenance log with any tasks completed and issues encountered.
